Enrollment and Program Completers

THIS PAGE INCLUDES:

>> [Enrollment and Program Completers](#)

In each of the following categories, provide the total number of individuals enrolled in teacher preparation programs for an initial teaching credential and the subset of individuals enrolled who also completed the program during the academic year.

Teachers Prepared

On this page, enter the number of program completers by the subject area in which they were prepared to teach, and by their academic majors. Note that an individual can be counted in more than one academic major and subject area. For example, if an individual is prepared to teach Elementary Education and Mathematics, that individual should be counted in both subject areas. If no individuals were prepared in a particular academic major or subject area, you may leave the cell blank. Please use the "Other" category sparingly, if there is no similar subject area or academic major listed. In these cases, you should use the text box to describe the subject area(s) and/or the academic major(s) counted in the "Other" category.

If your IHE offers both traditional and alternative programs, be sure to enter the program completers in the appropriate reports. For the traditional report, provide only the program completers in traditional programs within the IHE. For the alternative report, provide only the program completers for the alternative programs within the IHE.

After entering the teachers prepared data, save the page using the floating save box at the bottom of the page.

Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.

- >> [Teachers Prepared by Academic Major](#)

Teachers Prepared by Subject Area

Please provide the number of teachers prepared by subject area for academic year 2018-19.

For the purposes of this section, number prepared means the number of program completers. "Subject area" refers to the subject area(s) an individual has been prepared to teach. An individual can be counted in more than one subject area. If no individuals were prepared in a particular subject area, please leave that cell blank. ([§205\(b\)\(1\)\(H\)](#))

What are CIP Codes?

No teachers prepared in academic year 2018-19

If your program has no teachers prepared, check the box above and leave the table below blank (or [clear responses already entered](#)).

What are CIP codes? The Classification of Instructional Programs (CIP) provides a taxonomic scheme that supports the accurate tracking and reporting of fields of study and program completions activity. CIP was originally developed by the U.S. Department of Education's National Center for Education Statistics (NCES) in 1980, with revisions occurring in 1985, 1990, and 2000 (<https://nces.ed.gov/ipeds/cipcode/Default.aspx?y=55>).

Teachers Prepared by Academic Major

Please provide the number of teachers prepared by academic major for academic year 2018-19. For the purposes of this section, number prepared means the number of program completers. "Academic major" refers to the actual major(s) declared by the program completer. An individual can be counted in more than one academic major. If no individuals were prepared in a particular academic major, please leave that cell blank. ([§205\(b\)\(1\)\(H\)](#))

Please note that the list of majors includes several "Teacher Education" majors, as well as several noneducation majors. Please use care in entering your majors to ensure education-specific majors and non-education majors are counted correctly. For example, if an individual majored in Chemistry, that individual should be counted in the "Chemistry" academic major category rather than the "Teacher Education–Chemistry" category.

Program Assurances

THIS PAGE INCLUDES:

>> [Program Assurances](#)

Respond to the following assurances. Note: Teacher preparation programs should be prepared to provide documentation and evidence, when requested, to support the following assurances. [\(§205\(a\)\(1\)\(A\)\(iii\); §206\(b\)\)](#)

Program Assurances

1. Program preparation responds to the identified needs of the local educational agencies or States where the program completers are likely to teach, based on past hiring and recruitment trends.

- Yes
 No

2. Preparation is closely linked with the needs of schools and the instructional decisions new teachers face in the classroom.

- Yes
 No

3. Prospective special education teachers are prepared in core academic subjects and to instruct in core academic subjects.

- Yes
 No
 Program does not prepare special education teachers

4. Prospective general education teachers are prepared to provide instruction to students with disabilities.

- Yes
 No

5. Prospective general education teachers are prepared to provide instruction to limited English proficient students.

- Yes
 No

6. Prospective general education teachers are prepared to provide instruction to students from low-income families.

- Yes
 No

7. Prospective teachers are prepared to effectively teach in urban and rural schools, as applicable.

- Yes
 No

8. Describe your institution's most successful strategies in meeting the assurances listed above:

The above areas are strands across all levels of our Education major. All students are required to complete a field experience in at least one low SES school, while many complete more than that. We also try to have every student complete a rural experience as well. All students complete Educating the Exceptional Person. In this course, students learn about disabilities and the IEP process. In addition, all students complete a field experience in a special education classroom. A course in ESL is required in the reading endorsement, our largest endorsement area at the elementary level. The topic of ESL is in many major courses and all methods courses at both the elementary and secondary level.

Annual Goals: Mathematics

Each institution of higher education (IHE) that conducts a traditional teacher preparation program (including programs that offer any ongoing professional development programs) or alternative route teacher preparation program, and that enrolls students receiving Federal assistance under this Act, shall set annual quantifiable goals for increasing the number of prospective teachers trained in teacher shortage areas designated by the Secretary or by the state educational agency, including mathematics, science, special education, and instruction of limited English proficient students.

[\(§205\(a\)\(1\) \(A\)\(i\), §205\(a\)\(1\)\(A\)\(ii\), §206\(a\)\)](#)

Please note that the goals you set last year are not pre-loaded into your report because the Department's changes to wording of the questions in this section make them incompatible for pre-loading from last year's data. Next year, your goals will be pre-loaded into your report based on the goals you enter this year.

In order to complete this section, you may find it helpful to review your goals in your 2019 report. You may download and review your 2019 report by following the following steps: 1) click the Home tab, 2) click "Academic Year 2018-19 Data" in the banner near the top of the page to expand the dropdown, and select "Academic Year 2017-18 Data," 3) Click Download Report.

Report Progress on Last Year's Goal (2018-19)

1. Did your program prepare teachers in mathematics in 2018-19?

If no, leave remaining questions for 2018-19 blank (or [clear responses already entered](#)).

- Yes
 No

2. Describe your goal.

Our goal was to add 4 prospective teachers to our program in 2018-19.

3. Did your program meet the goal?

- Yes
 No

4. Description of strategies used to achieve goal, if applicable:

Yes. We had 4 program completers in mathematics during the 2018-19 year.

5. Description of steps to improve performance in meeting goal or lessons learned in meeting goal, if applicable:

6. Provide any additional comments, exceptions and explanations below:

Review Current Year's Goal (2019-20)

7. Is your program preparing teachers in mathematics in 2019-20? If no, leave the next question blank.

Assessment Pass Rates

The pass rates table is populated from files provided by the testing company or state. The table provides information on the performance of the students in your teacher preparation program on each teacher credential assessment used by your state. In cases where a student has taken a given assessment more than once, the highest score on that test is used. In the case of a teacher preparation program with fewer than 10 scores reported on any single initial teacher credential assessment during an academic year, the program shall collect and publish information with respect to an average pass rate and scaled score on each state credential assessment taken over a three-year period. [\(§205\(a\)\(1\)\(B\)\)](#)

Please note that this page does not have an edit feature as the pass rates have already been through several rounds of verification. If you identify an error, please contact Westat's Title II Support Center and your testing company representative.

Use of Technology

1. Provide the following information about the use of technology in your teacher preparation program. Please note that choosing 'yes' indicates that your teacher preparation program would be able to provide evidence upon request. ([§205\(a\)\(1\)\(F\)](#))

Does your program prepare teachers to:

- a. integrate technology effectively into curricula and instruction

Yes
 No

- b. use technology effectively to collect data to improve teaching and learning

Yes
 No

- c. use technology effectively to manage data to improve teaching and learning

Yes
 No

- d. use technology effectively to analyze data to improve teaching and learning

Yes
 No

2. Provide a description of the evidence that your program uses to show that it prepares teachers to integrate technology effectively into curricula and instruction, and to use technology effectively to collect, manage, and analyze data in order to improve teaching and learning for the purpose of increasing student academic achievement. Include a description of the evidence your program uses to show that it prepares teachers to use the principles of universal design for learning, as applicable. Include planning activities and a timeline if any of the four elements listed above are not currently in place.

Technology is integrated and modeled across Education courses at the various levels. Students use technology to complete projects and assignments in both university classrooms and field classrooms including the use of interactive white boards. The use of technology is modeled by faculty in selected courses and students are able to apply the use of this technology in field experiences when appropriate. The following are three such examples. In Exceptional Persons, as course required by all candidates, a portion of an assignment is to identify appropriate technology tools (including assistive technology) to use with individuals with special needs. At the elementary level, there is an assignment related to technology integration in all content areas. In Reading and Social Studies, students complete a project using Google Earth related to both the content of book they are reading but to also learn about the geographical information in that region. In both Math and Science, students identify technology applications that are applicable to those content areas and critique them for use in the classroom. At the secondary level, students complete a technology project on how to integrate technology in their content area. In addition, students are required to complete teacher work sample assignments in which they gather data, analyze that data, and revise lesson plans according to their findings. In other clinical and field requirements students gather data on individual children and analyze that data to provide individualized instruction. During student teaching, students are required to collect data and refine lessons to meet students' needs in order to satisfy a student teaching core requirement. Finally, students are required to use an ePortfolio system to document their learning throughout the program. Students are admitted into or out of the teacher education program based on assessment data. Major assignments in these courses are

aligned to the program goals (InTASC & Iowa teaching standards) which provides the Education faculty with data on students' progress in each area. Students that are getting the reading endorsement and/or special education endorsements take ED 380 Characteristics of Mild/Moderate Disabilities. This course has a number of technology applications integration of technology for instructional purposes in addition to a tool for accommodations for students that have disabilities.

Teacher Training

THIS PAGE INCLUDES:

>> [Teacher Training](#)

Provide the following information about your teacher preparation program.

(§205(a)(1)(G))

Teacher Training

1. Provide a description of the activities that prepare general education teachers to:

a. Teach students with disabilities effectively

All candidates complete ED 263 Exceptional Persons. In this course, candidates are provided an overview of effective strategies, and then learn about numerous specific disabilities. This course includes a field experience with a special teacher. As candidates transition to methods courses, they complete lesson plans that include differentiation and accommodations for students with disabilities.

b. Participate as a member of individualized education program teams, as defined in section 614(d)(1)(B) of the *Individuals with Disabilities Education Act*.

During Exceptional Persons, all candidates participate in an IEP Workshop and complete a reflection that highlights the importance of general education teachers' involvement in the IEP process. The speakers present information that addresses both IEP procedures and provides a parental involvement perspective. These are topics that are also addressed throughout the course.

c. Effectively teach students who are limited English proficient.

Working with ESL students is a topic that is addressed in math courses. First, an overview is provided in Exceptional Persons with definitions and examples of different programming options. During methods courses, especially in reading courses, candidates must address ESL in their differentiation options. Elementary candidates gaining the reading endorsement are also required to take at least one ESL course.

2. Does your program prepare special education teachers?

- Yes
 No

If yes, provide a description of the activities that prepare *special education teachers* to:

a. Teach students with disabilities effectively

All of the candidates receiving special education endorsements take the same general education courses described above. In addition, they also take a series of courses related to strategies and methods to use with students that have disabilities. They also participate in field experiences with special education teachers where they teach consecutive lessons to students that have IEPs.

b. Participate as a member of individualized education program teams, as defined in section 614(d)(1)(B) of the *Individuals with Disabilities Education Act*.

In addition to the IEP Workshop, candidates receiving special education endorsements participate in numerous activities to prepare them to be a member of an IEP team. For example, in Foundations of Special Education, candidates participate in a mock IEP. Each candidate assumes a different role to experience the different components. During methods courses, candidates write an IEP based on one of the students from the field.

They facilitate a mock IEP with their peers. As student teachers, candidates are asked to write and conduct an IEP meeting in conjunction with their cooperating teacher.

c. Effectively teach students who are limited English proficient.

Special education methods courses instruct students in strategies that benefit students from a variety of need areas, including students who are limited English proficient. These needs may also be addressed in mock lesson plans.

Contextual Information

Please use this space to provide any additional information that describes your teacher preparation program(s). You may also attach information to this report card (see below). The U.S. Department of Education is especially interested in any evaluation plans or interim or final reports that may be available.

We review student data three times per year to make decisions on student's entrance and continuation in the program and set our program goals. Additionally, we complete the annual reports for our state department of education and our university. We continue to use our web-based electronic Learning Management System tool to provide students with critical feedback necessary for successful program continuation.
