

How do I find evidence-based practice (EBP) in nursing?

Step One: Select CINAHL with Full Text from EBSCO.

Step Two: Insert topic(s) into search form(s). In the right field, use pull-down menu to specify topic as subject, part of title, part of abstract, author name, or other option.

Step Three: Select "Evidence-Based Practice" from the left side of "limit your results" options.

The resulting articles will reflect evidence-based practice. Look for the item note, seen in parentheses, following an article's citation. The document type will match a form of evidence-based practice.
