

## How do I find scholarly (peer-reviewed) literature in nursing?

**Step One:** Select CINAHL with Full Text from EBSCO.

**Step Two:** Insert topic(s) into search form(s). In the right field, use pull-down menu to specify topic as subject, part of title, part of abstract, author name, or other option.

**Step Three:** Select “Scholarly (Peer Reviewed) Journals” from the left side of “limit your results” options.

The resulting articles will be peer-reviewed. Search results will reflect associated abstracts (summaries of content), an element of scholarly publishing. Look for the “Academic Journal” icon on the left to indicate a journal article.
