

How do I find literature using SAGE Journals?

Step One: From the SAGE journals homepage, select the advanced search option, located in the upper right corner. Discipline-specific browsing and search options occur in the page's second column.

Step Two: Insert search terms and select applicable limiters. Limit by publishing year, if needed, and select “search.”

Step Three: Search results provide journal cover images, citations, access to abstracts, and PDF files. “Article Available” indicates full-text access. “References” produces the article’s works cited list. “Check item” places the article in a marked list.

Step Four: Select an article's PDF icon to view the document. Articles load with SAGE cover pages, followed by the text. The right menu provides citing details, direct links to Google Scholar, sharing options (social media), and links to the journal inside SAGE. A dedicated link to the journal's table of contents is also present.

The screenshot shows the SAGE Journals website interface. At the top, there is a navigation bar with 'Institution: MOUNT MERCY UNIVERSITY', 'Sign In', 'My Tools', 'Contact Us', and 'HELP'. Below this is a search bar with 'Search all journals' and options for 'Advanced Search', 'Search History', and 'Browse Journals'. The main content area features the article title 'Economic Voting and Political Sophistication in the United States' with a subtitle 'A Reassessment'. The authors listed are Jean-François Godbout (Simon Fraser University, Vancouver, Canada) and Éric Bélanger (McGill University, Montreal, Canada). A short abstract follows, discussing the conditioning effect of political sophistication on economic voting in U.S. presidential elections. On the right side, there is a sidebar for 'POLITICAL RESEARCH QUARTERLY' with a search bar, navigation links, and a 'This Article' section containing a DOI, journal information, and various service options like 'Show PDF in full window', 'Full Text (PDF)', 'Citing Articles', and 'Share'.

Step Five: After checking several search items, select “ADD CITATIONS” under “My Marked Citations.” The database will then assemble a list of records. Now select “Save/Print/Email/Download.”

The screenshot shows a user interface for 'My Marked Citations'. It includes a header 'My Marked Citations' and two buttons: 'Check All' (with a blue plus icon) and 'Uncheck All' (with a red minus icon). Below these are three main buttons: 'ADD citations [0]' (with a green plus icon), 'VIEW citations' (with a blue left arrow icon), and 'Save/Print/Email/Download' (with a blue left arrow icon).

Step Six: Select format for records; printer-friendly view creates HTML file. Print this file directly from the browser. Select “Save to My Computer” to create a text file of records. “Download to Citation Manager” interacts with RefWorks.
