

How do I locate nursing literature in Science Direct?

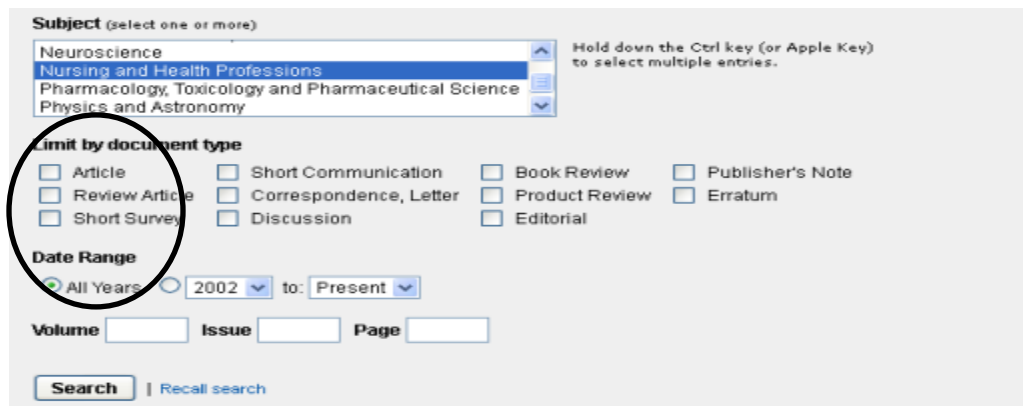

Step One: Select ScienceDirect as database of choice.

Step Two: On the homepage, select the “Journals” tab from the “All Sources Box.” Insert topic(s) into the search forms. Select “Abstract, Title, Keywords” from the right, pull-down menu to increase relevance to search.

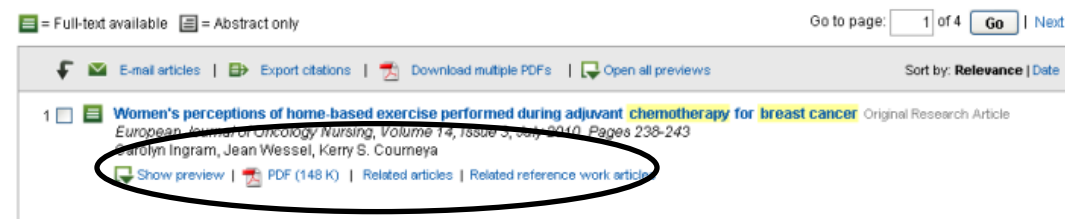

The screenshot shows the ScienceDirect homepage search interface. At the top, there are navigation links: Home, Browse, Search, My settings, My alerts, and Help. Below these are search filters for Articles (selected) and Images, with options for All fields, Author, Volume, Issue, and Page. A search button is present. A banner for F1000 SciVerse is visible. Below the banner, the 'All Sources' box has 'Journals' selected. The search input field contains 'breast cancer and chemotherapy'. The search scope is set to 'Abstract, Title, Keywords'.

Step Three: On the search form, now select “Nursing and Health Professions” from the subject roster. You may limit by document type (“Article”) and specify a date range. All matching literature will reflect evidence-based practice.

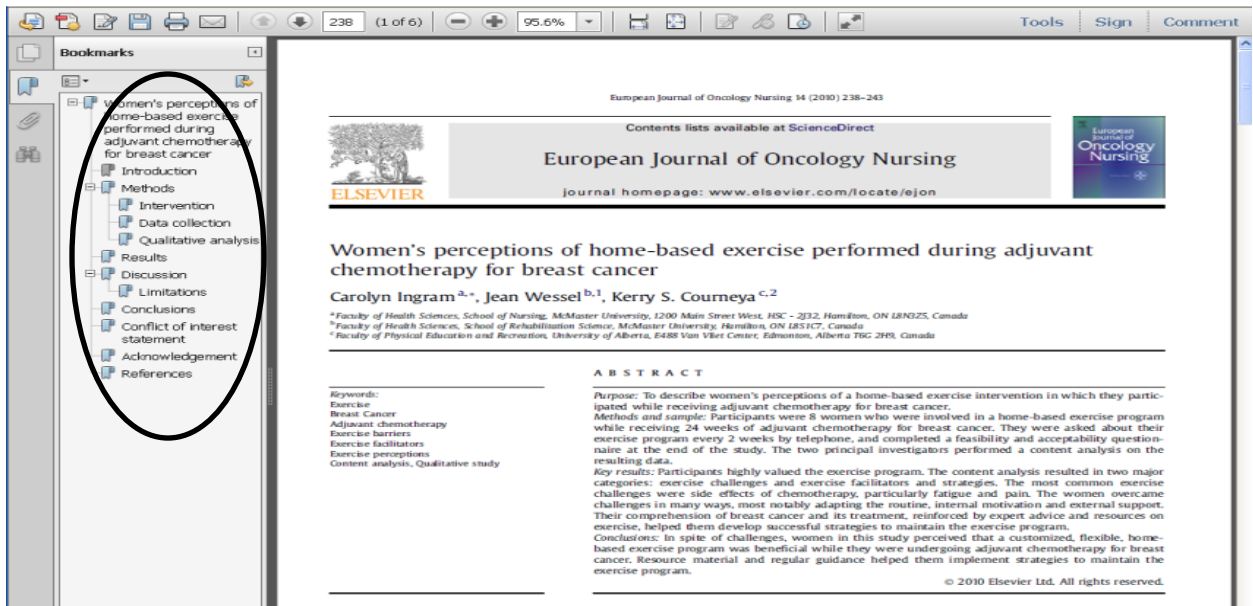

The screenshot shows the ScienceDirect search filters. The 'Subject' dropdown is set to 'Nursing and Health Professions'. The 'Limit by document type' section has 'Article' selected. The 'Date Range' is set to 'All Years'. There are also fields for Volume, Issue, and Page, and a Search button.

Step Four: The next page reflects search results. Each record offers publishing details and several document options.

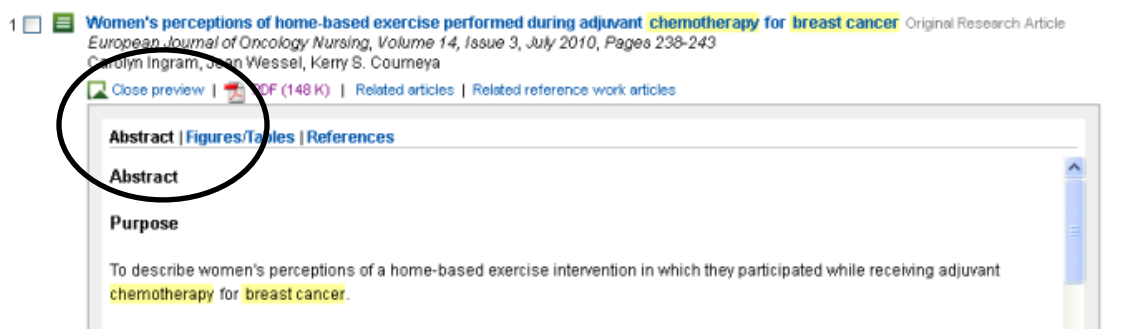

The screenshot shows the ScienceDirect search results page. The first result is 'Women's perceptions of home-based exercise performed during adjuvant chemotherapy for breast cancer'. The 'Show preview' and 'PDF (148 K)' options are circled. The page also shows navigation options like 'Go to page: 1 of 4' and 'Next >'. There are also options for 'Full-text available' and 'Abstract only'.

Step Five: Notice the “page” icon appearing in the article’s record. If the icon is green, the full-text PDF is available. Select the PDF icon to view both the table of contents and full article. Printing, saving, and email functions occur through Adobe Acrobat Reader.

Select the “Show Preview” option to view an article’s abstract and other article sections.

Step Six: Select “Related Articles” to view search results for articles about the same subject. Select “Related reference work articles” view entries from scholarly reference titles.
